Summary

CS undergraduate at MIT WPU specializing in AI/ML, with hands-on experience fine-tuning deep learning models such as EfficientNet-B4 on 236,000+ images, building NLP-based classifiers, and deploying full-stack applications via FastAPI, Next.js, and cloud platforms. Comfortable working across the full pipeline — from data engineering and feature engineering to model training and production deployment.

Projects

- Deepfake & AI-Generated Face Detection** | GitHub | Live Demo March 2026 – April 2026
- Performed data engineering and data integration to consolidate 236,000+ face images from multiple sources — GAN-generated, face-swapped, and morphed — applying data transformation and augmentation to build a unified training pipeline.
 - Fine-tuned EfficientNet-B4 on the processed dataset, achieving 99%+ validation accuracy across all manipulation types.
 - Built and deployed a full-stack web application with a FastAPI inference backend on Hugging Face Spaces and a Next.js frontend on Vercel, with real-time predictions served via REST API.
- Mental Health Classifier using ML Algorithms** | GitHub | Live Demo Feb 2026 – April 2026
- Performed data wrangling and feature engineering on social media text data integrated from multiple sources, applying NLP-based preprocessing techniques to prepare inputs for statistical modeling.
 - Applied predictive analytics using multiple machine learning models for classification of mental health conditions, achieving 86% accuracy across 5 classes. Deployed front-end on HuggingFace Spaces using Streamlit.
- Automated Code Quality Verification System** | GitHub Aug 2025 – Dec 2025
- Developed and deployed a fully automated CI/CD pipeline on AWS integrating Jenkins, Docker, and SonarQube for continuous integration, testing, and code quality analysis.
 - Implemented infrastructure automation using EC2 and S3, with GitHub as the source control system to streamline development workflows.

Education

- MIT World Peace University (MIT WPU)** Pune, Maharashtra
B.Tech in Computer Science and Engineering *Aug 2023 – Present*
 - CGPA: 7.39
- Campion School** Bhopal, Madhya Pradesh
Class 12th (Higher Secondary) *Completed April 2023*
 - Percentage: 88.2%

Skills

Programming Languages: C, C++, Python, Java, JavaScript
Data Science: Pandas, Scikit-Learn, Seaborn, SQL, Postgres, Tableau, PowerBI, Data Mining, Data Integration
Web & Development: HTML5, CSS, JavaScript, Node.js, Three.js, React.js, Angular.js, Next.js, TypeScript
Cloud & DevOps: AWS (EC2, S3), Docker, Jenkins, SonarQube, Vercel, Render, HuggingFace
AI Tools: Claude, Cursor, GitHub Copilot, GenAI Tools
Soft Skills: Problem Solving, Punctuality, Adaptability, Creativity, Teamwork
Spoken Languages: Hindi, English

Certifications

- Industry Ready Tech Foundations** 2026
LnT Edutech *View Certificate*
- Google AI for Anyone** 2024
Google *View Certificate*
- Data Visualization and Building Dashboards with Excel and Cognos** 2024
IBM *View Certificate*
